-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-12, 21-32 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Ingman et al. (U.S. Patent # 6,069,804).

Ingman et al. disclose the claimed subject matters a DC-DC converter (figures 1-10), including a power transformer (figure 9, item 60), a first and second windings (figure 9,

item 40 and 123), a first and second semiconductor switches (figure 9, item 116 and 112), first and second control circuit (figure 9, item 117 and 125), a current sensors (column 4, line 40-45), zero volts and a reverse current (column 12, line 20-40), a controlled winding (figure 9, item 124).

3. Claims 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Faulk et al. (U.S. Patent # 6,069,804).

Faulk disclose the claimed subject matters a DC-DC converter (figure 3A-B), including self-regulation (column 30, line 35-40), a power transformer (figure 3Aitem 100), primary and secondary winding (figure 3A, item 102 and 104), a primary and a secondary semi-conductor switches (figure 3A-B, item 110 and 116), over-voltage and zero crossing (column 25, line 1-65).

4. Claims 33-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Taurand (U.S. Patent # 5,745,351).

Taurand discloses claimed subject matters a DC-DC converter (figure 3, 7, 10 and 12-15), including a power transformer (figure 10, item 60), a first and second windings (figure 10, item Lp and Ls), a first and second semiconductor switches (figure 10, item Tp and Ts), first and second control circuit (figure 10, item 70 and 80), a current sensors (column 7, line 40-45), zero volts (column 10, line 10-15), a reverse current (column 12, line 60-65).
